

RAFAEL ALFONSO CORREDOR GAMBÍN

Cereté, Córdoba, Colombia | +57 313 543 9677 | rafaelcorredorgambin1@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL PROFILE

Systems Engineer with complementary training in Software Engineering, specialized in the full software development lifecycle: analysis, design, implementation, testing and deployment of information systems, mobile applications and cloud microservice architectures.

Full Stack Developer and DevOps Engineer with experience leading the development and evolution of microservice platforms (Spring Boot, PostgreSQL, Express.js, Angular, TypeScript), applying Hexagonal Architecture and SOLID principles, and managing CI/CD pipelines on Azure DevOps with deployments to AWS. I complement this profile with AI integration in products: prompt engineering, RAG, MCP (Model Context Protocol) and agent orchestration.

Currently broadening my specialization with a Master's Degree in Cybersecurity (UNIR, Spain) and a Graduate Specialization in Artificial Intelligence (Universidad CUN). I am defined by continuous learning, technical leadership in agile teams and a focus on maintainable, scalable solutions. English level B1.

PROFESSIONAL EXPERIENCE

Software Developer / Junior DevOps Engineer

SETI S.A.S

Feb 2026 – Present

Medellín, Antioquia, Colombia · Remote

- Full-stack development, maintenance and continuous evolution of a cloud-deployed microservices application, taking part in the whole lifecycle: feature design, implementation, bug fixing and refactoring.
- Design and implementation of services following Hexagonal Architecture and SOLID principles, ensuring scalability, maintainability and a clear separation of responsibilities.
- Quality assurance through unit testing with JUnit, Mockito and Jest, complemented by manual testing and peer code reviews.
- Integration of artificial intelligence capabilities into the product: prompt engineering, RAG (Retrieval-Augmented Generation) architectures, and consuming and exposing tools through MCP (Model Context Protocol).
- Orchestration of AI agents to automate development and support tasks, connecting models with internal data sources and existing services.
- DevOps role: support and improvement of CI/CD pipelines on Azure DevOps, deployment and maintenance of applications on AWS, release process automation and environment monitoring.
- Cross-functional collaboration with the development team to improve delivery times and the operational efficiency of the area.

Systems Engineering Internship

Universidad de Córdoba

Aug 2025 – Dec 2025

Montería, Colombia · Remote

- Development of an IoT system to monitor climate-change-related variables in the shade houses of the Faculty of Agronomy (temperature, humidity and environmental conditions).
- Implementation of REST APIs for data management and processing, with a Node.js (Express) and MongoDB backend.
- Development of a Flutter mobile application for real-time visualization and remote control of the system.
- Integration of ESP32 devices through socket communication for automated control of the irrigation system.
- Implementation of real-time push notifications with Firebase Cloud Messaging (FCM).
- Deployment of services on AWS and infrastructure configuration for production environments.

Software Engineering Internship

Universidad de Cartagena, Piedra Bolívar Campus

May 2025 – Aug 2025

Cartagena, Colombia · Remote

- Implementation of REST APIs for managing, processing and visualizing data from IoT devices.

- Integration of sensors and services for real-time monitoring of photovoltaic systems.
- Design of responsive web interfaces focused on the analysis and control of energy information.
- Use of SQL and NoSQL databases, version control with Git and work under agile methodologies.

Academic Tutor

Sep 2024 – Dec 2024

Universidad de Cartagena, Cereté Tutorial Center

Cereté, Córdoba, Colombia · Hybrid

- Academic support for students in programming and data structures courses, with reinforcement in object-oriented programming in Java.
- Support in solving practical exercises, clarifying theoretical concepts and tracking student progress.
- Promotion of collaborative learning and good programming practices.

EDUCATION

Master's Degree in Cybersecurity

In progress, expected completion in 2027

UNIR, Universidad Internacional de La Rioja (Spain)

Sep 2026 – Present

Graduate Specialization in Artificial Intelligence

In progress, expected completion in 2027

Universidad CUN

Sep 2026 – Present

Software Engineering

In progress

Universidad de Cartagena, Cereté Campus

Ninth semester

Systems Engineering

Professional degree

Universidad de Córdoba, Montería

CERTIFICATIONS

- Junior Spring & Java Developer – Oracle Next Education (completed).
- AWS Cloud Practitioner.
- Software Architecture.

TECHNICAL SKILLS

Backend: Spring Boot (Java), Node.js / Express.js, NestJS, Python, Laravel, Django, PHP

Frontend: Angular, React, Next.js, TypeScript, JavaScript, CSS/SASS, Tailwind, Bootstrap

Mobile: Flutter

Databases: PostgreSQL, MongoDB (SQL and NoSQL)

Architecture & quality: Hexagonal Architecture, microservices, SOLID principles, unit testing (JUnit, Mockito, Jest)

DevOps & Cloud: Azure DevOps (CI/CD), AWS, Git, deployment automation, environment monitoring

Applied AI: Prompt engineering, RAG (Retrieval-Augmented Generation), MCP (Model Context Protocol), AI agent orchestration, Claude Code

Methodologies: Scrum / agile methodologies, collaborative work, code review

LANGUAGES

Spanish: Native

English: Intermediate (B1)
